## About me

I'm a web development enthusiast with a strong experience in project leadership that has significantly improved efficiency and process control. My main focus is on creating comprehensive systems, using technologies like PHP, JavaScript, CSS with Tailwind, and HTML, along with frameworks like Astro and learning React.

## Work Experience

### Java Application

2023 - 2024

Software Developer

A company dedicated to clinical laboratories requested a desktop program, which I developed using Java with NetBeans and a SQLite database, due to the project's requirements.

### Figra-Gas

2023

Full-Stack Developer

I developed the website for this company using HTML, CSS (Bootstrap), and vanilla JavaScript. The design aimed to be simple but clearly display the company's prices and images and be responsive.

### Tlatlauquitepec Laboratories

2023

Front-End Developer

I developed their website using HTML, CSS (TailwindCSS), vanilla JavaScript, with the Astro.build framework. The goal was to create a corporate and formal design using their institutional colors.

## MACE

2021

Full-Stack Developer

I developed a venture with some university colleagues focused on the development of websites, web applications, and desktop applications. For its creation, we used Astro, HTML, CSS (Tailwind), and JavaScript.

## Education

Bachelor - Computer Science

2019 - 2023

Autonomous University of the State of Hidalgo

## Projects

### Portfolio

I wanted to use technologies to practice and create a portfolio showcasing my skills, and I deployed it on Netlify.

Self-taught   In progress

### Connect 4

In my learning process of new technologies, I completed a Connect 4 project using React resources and hooks, specifically useState, and deployed it on Netlify.

Self-taught   React

### Curriculum Vitae

I wanted to put my knowledge into practice to display and print a CV, inspired by the one shown by the creator Midudev.

Self-taught   React

## Skills

HTML   CSS   JavaScript   Tailwind   MySQL   Git   GitHub   React
